Free COVID-19 Testing Moves to RiverStone Health Clinic

WHO: RiverStone Health Free COVID-19 Testing
WHAT: Moving to RiverStone Health Clinic: Viral Care Clinic
WHEN: Opens Monday, April 19
WHERE: 123 South 27th Street

Billings, MT – On Monday, April 19, RiverStone Health’s free COVID-19 testing site will move to the RiverStone Health Clinic’s Viral Care Clinic.

“Fewer people are getting tested for COVID-19 and because of that it allows us to accommodate those who still wish to be tested, in our community health clinic,” said John Felton, Yellowstone County health officer and RiverStone Health President and CEO.

The current testing site, on the United Way campus, will remain open through Friday, April 16. The free testing at RiverStone Health will open Monday, April 19 at 8:00am.

Tests will be by appointment only and can be scheduled Monday through Friday from 8am to noon. To schedule a COVID-19 test, call 406.247.3350. To get to the Viral Care Clinic, you enter through the Main Clinic front entrance.

The free testing is open to anyone whether you have symptoms of COVID-19 or not. Tests include the Binax rapid antigen test with results in about 20 minutes and the PCR test, which requires lab processing that usually takes a few days.

Tests for Travelers:

Anyone who would like a COVID-19 test to travel will need to schedule a test through RiverStone Health’s Immunization Clinic in the Lil Anderson Center. The results from that test are available that day and cost \$111. To schedule a travelers test call 406.247.3382.
